

NGALI ENERGY

Ngali Energy Limited, a regional energy company helping Africa address pressing energy challenges

Ngali Energy, a Rwandan energy company has specialized in the development, operation and maintenance of energy assets in East Africa and beyond the region which creates an impact on society.

Bodifa Mercy House in Kigali supports operations at the Rukarara 1 hydropower plant. The plant has a full team consisting of a plant manager, operation technicians and maintenance technicians.

Started in 2010 in Rwanda, the company has expanded its investments into Southern Sudan. It also has foot prints in Kenya and Congo Brazzaville jointly developing energy generation to support the host countries to address their electricity needs.

Mr. John Rugwe says that the company has different development projects and currently his team is working on 5 projects. The five hydropower projects production capacities range from 2-3MW aggregating to 12.8MW in terms of capacity.

These are some of the countries that face a severe shortage of essential electricity infrastructure undermining efforts to achieve more rapid social and economic development.

"For those particular projects we started from site identification and feasibility studies done by Ngali Energy in-house resources," he further explains.

Against this backdrop, Ngali Energy has recruited a fine team of experts who help in energy policies formulation, energy generation, transmission and distribution systems.

The company is planning to reach financial close in Q1 2017 and thereafter start construction of these 5 projects. When construction will be completed, the assets will be moved from development departmental units to the generation department.

Ngali Energy legal team has specialized in the negotiation of concession agreements with the government and relevant authorities. It is also involved in negotiation of Power Purchase Agreements with the off taker. Ngali also has an engineering and finance team working on adding value to these people and assets up to financial close and implementation of the projects.

As a company with deep roots in the African continent, the company has invested beyond Rwanda as it seeks projects for their positive impact and transformative capabilities for the people and their investment potential.

Ngali's area of investment, operations and research include; hydro power plants, solar power plants, thermal power plants, distribution utilities, transmission lines and green energy.

Explaining that Ngali Energy is a regional energy company, Rugwe revealed that the company is managing a 3 MW thermal power plant in South Sudan and other projects in Congo Brazzaville and Kenya. In South Sudan, the company is involved in generation, transmission and distribution.

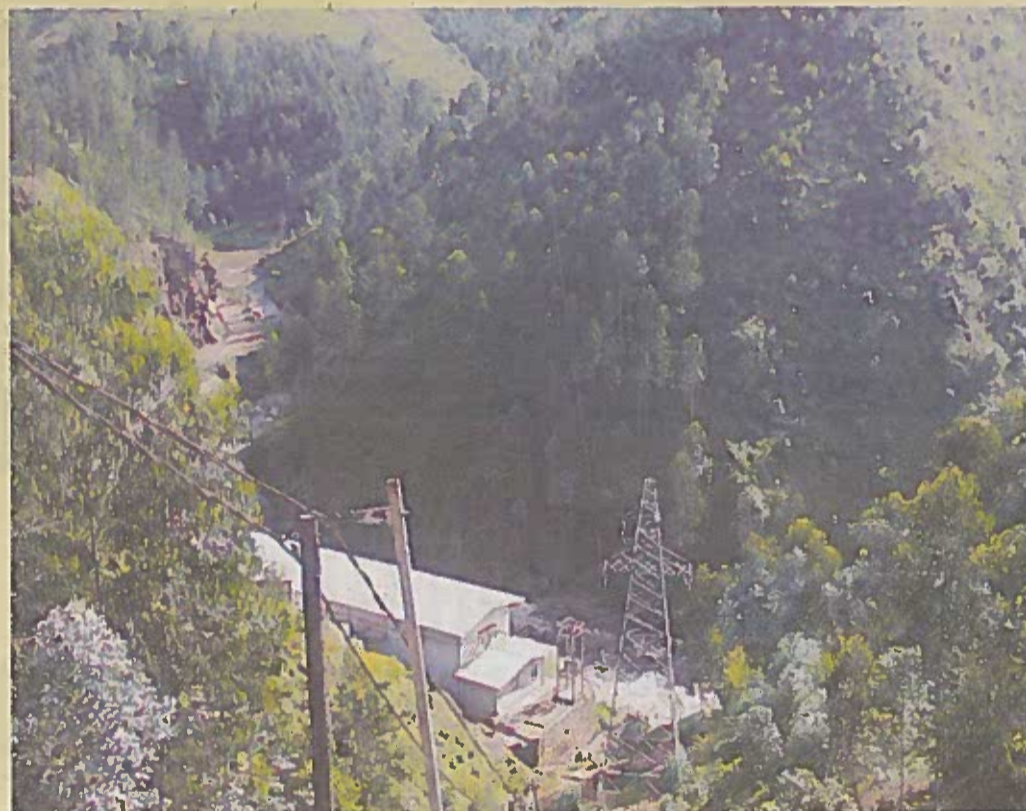

"We are always involved in early development of projects," said John Rugwe, Managing Director of Ngali Energy Ltd.

Ngali Energy's Experience

At the company's conception, hydropower was identified as one of the most promising sources of energy. As such, it has been the company's main focus in recent years. Rwanda, the land of a thousand hills has a varying landscape and river systems that allows for immense hydro generation potential "We really pride ourselves in coming to projects at a very early stage and add value to the project up to financial close and eventually implementation, operation and maintenance. Currently we are operating a 9 MW hydropower plant located in the southern province in Nyamagabe called Rukarara 1 HPP," said Rugwe.

WHY INVEST IN NGALI ENERGY?

- Ngali Energy is one of the largest Independent Power Producers in Rwanda.
- Ngali Energy invests in a highly profitable and top priority sector in Rwanda and the region.
- Guaranteed and high return on investment
- Favorable investment climate in Rwanda
- In depth understanding of the local, regional and African market at large.
- Ngali Energy is well networked in the Country as well as in the East Africa region
- Strong shareholders' support.
- Strong vision to be a dominant Energy Company in Africa.

- At its disposal, Ngali Energy has a highly skilled, experienced, committed and motivated team.

"As a company with deep roots in the African continent, we seek projects for their positive impact and transformative capabilities for our people in addition to investment potential. We are always open to partners and investors who share our passion, vision and commitment to Africa and its people."
